Education

B.Tech In Computer Science and Engineering (Data Science)

2022-2026

Sardar Patel Institute of Technology

Mumbai

CGPA:8.87

Higher Secondary School Certificate

2022

Prakash Junior College

Mumbai

Percentage:-85.4%

Experience

Tata Consultancy Services (TCS)

December 2024 – February 2025

Cyber Security Intern

Mumbai, Maharashtra

- Gained hands-on experience in enterprise vulnerability management by **identifying** and validating vulnerabilities such as **SQL Injection**, **XSS**, **CSRF**, **CORS**, broken authentication, and improper access control.
- Performed manual **testing** to validate automated scan results, crafted **custom payloads**, and bypassed common security filters using **Burp Suite**, **SQLMap**, and **PortSwigger** tools.
- Used **Kali Linux** and various security assessment techniques, including **Google Dorking**, for information gathering and vulnerability analysis.

IDFC FIRST Bank

January 2026– present

Application Engineer

Hyderabad, Telangana

- It started with a 6-month internship which eventually converted into a full time role where I Worked on **Identity and Access Management (IAM)** and **Identity Governance and Administration (IGA)** solutions, contributing to access provisioning and governance workflows.
- Developed and integrated RESTful APIs using **Golang** for a full-stack movie ticket booking system, leveraging **PostgreSQL**, Go concurrency for concurrent ticket bookings, **JWT**-based authentication, and **GoCD** for CI/CD deployment; also contributed to enterprise application development and maintenance.
- Designed and implemented an Intelligent AI/ML Based access provisioning and access review system for role-based access provisioning, leveraging event-driven architecture concepts.

Skills

Programming Languages:C++, Java, Javascript,Golang,Python

Databases:SQL, Firebase, MongoDB,PostgresSQL

Frameworks: ReactJS, NodeJS, Express, Tailwind

Tools & Platforms:GitHub,VS Code, Postman, Linux (Kali/Ubuntu),Docker

Course Work:DBMS,Computer Communications and Networking, Java OOPS, Distributed Systems

Projects

Jodi Junction | *ReactJS,Firebase,Javascript,Css*

[Github](#)

- Built a **Wedding Management System** with secure **user authentication** using Firebase,to enhance planning and reduce costs of wedding management.
- Implemented a shopping cart,todo list to minimize last minute chaos and a budget filter for improved budgeting.
- Made a **realtime chat application** using React and Firebase for easier contact with vendors,a **map** using leaflet for easy exploration of vendors.

YOROKOBI | *NodeJS,MongoDB,Express,ReactJS,Javascript,Tailwind*

[Github](#)

- Yorokobi is an innovative **restaurant queue management system** that provides **real-time updates**, enables **remote queue joining**, wait time updation, and allows customers to submit reviews and ratings.
- Did user authentication using **JWT**,preventing unauthorized access and mitigating risks of session hijacking and token tampering.
- Integrated **restaurant API** with MongoDB and added **dynamic queue handling** based on customer arrival time and allotted duration based on number of guests.
- Built a Leaflet-based **map with Geolocation API** to locate nearby restaurants to user and navigate via Google Maps.

- Built a **Codeforces problem recommender** using **K-Nearest Neighbors (KNN)** to suggest problems based on difficulty (rating) and popularity (solved count).
- Implemented a performance factor that dynamically adjusts the difficulty range using a calculated performance factor derived from the questions solved.
- Deployed a **RESTful API using Flask**, enabling frontend integration for real-time recommendation updates.

Leadership / Extracurricular

- **Executive Head, Sports Committee, S.P.I.T.** (May 2023 – June 2024)
- Led and managed a team of 100 students to successfully conduct a college marathon with 1000+ participants.
- Organized an inter-college sports event involving participation from nearly 60 colleges across mumbai.
- Played a key role in the Public Relations team to boost visibility and attract high footfall for all events with simultaneously managing the team efficiently.
